Reasons for Allowance

1. The present claims are deemed allowable over the references of record as exemplified by Zager et al. since the references of record fail to disclose or render obvious the claimed structure.

While Zager et al. disclose release layers for master transfer media, Zager et al. fail to disclose a structure meeting applicants' claimed limitations. Specifically, with regard to claim 16, Zager et al. only teach using a release coating (*i.e. the layer that contacts the recording medium during the transfer process*) over a *polymer* layer, not a metal layer. In the event that the opaque metal layer is used, Zager et al. teach using Cr as this metal layer, which is also what they teach as a suitable release coating. One of ordinary skill in the art would not have been motivated to place a release coating over a layer that is already taught to *be* such a release coating.

With regard to claim 23, while the claim is open to a release layer over a polymeric layer, the Examiner notes that the claimed release layer materials are not anticipated, nor rendered obvious, by the materials listed in Zager et al. as suitable release coatings.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
